Full-stack developer ITneeds

freelance

- Web and mobile products, internal company tools, API integrations, Web3 solutions and process automation.
- Crypto trading wallet for iOS and Android: passkey and biometric unlock, API with background job queues, cross-network transfers, smart-contract work with tests, CI/CD with over-the-air releases.
- Auction system and classifieds marketplace on Laravel, plus AI automation for document and email extraction and routing (Anthropic API).

Accountant Inmita

part-time

- Accounting alongside programming. Gives direct, inside understanding of back-office processes: which steps are worth automating, and which are cheaper and safer left to a person.

\$ ls ./work

Messaging app2025-2026

Each side reads in their own language: text is translated per recipient, voice notes transcribed, translated and re-spoken.

ReactTypeScriptSocket.IOExpressPrismaCapacitor

Crypto mining platform2024-2025

NDA

Wallet, swap, miner management, admin. I built the web app twice: Blazor WASM, then a rewrite to React.

Blazor WASM.NET 8React 18SignalR

E-shops and payments2024

Catalogue, cart, checkout and payment provider integrations. Client names stay private.

WordPressWooCommercePHP

Crypto trading wallet2025-2026

NDA

Wallet on iOS and Android: balances, trading, cross-network transfers. Mobile app, API side and smart-contract work.

React NativeExpoExpressPostgreSQLSolidity

Auction platform2024

Lots, real-time bidding, winner resolution, bidder accounts and administration.

LaravelMySQL

ITneeds2026itneeds.lt

Portfolio whose demos all run for real on the same server: a goroutine race, on-chain prices, a Three.js furniture configurator, a CSV sorter and an AI chat.
